
Introduction:

Dear Donors, Friends and Well wishers,

We are happy to submit our first annual report of Regenboog India Foundation...

It was a great year for us by starting this organization, a little seed planted and grown up today as a small sapling (small tree). We are sure that with all your good cooperation and motivation it will grow like a big tree to give benefits to the needy people in this society.

Official Works:

Regenboog was started in December 2006 and then the official works have started on full speed. First 12A registration and Income Tax exemption for the donors from Income Tax department have applied with proper documents. Two different bank accounts have opened for the local contributions and Foreign contributions.

Projects:

As per the decisions taken in the Board meeting, two projects were started initially. A rural health care project and a children home for the needy children have started. The rural health care project was named as "Arunachala village medical program" and children home was named as "Sarasvathi children home". With the good support of the donors from local, both projects have started serving the needy people in this society.

In rural health care project, we are giving our service to the people in Aruthangudi village and Koovanur village. A well qualified doctor, a nurse, a pharmacist and volunteers team visited these villages and given treatment to the patients. In February and March months, we have treated totally 2172 patients. In these two months the team visited every Wednesdays and Saturdays to these villages (each 6 days). So the average patient count per day is 181.

In January 2007, we have conducted a free eye care camp in Vedyappanur village and Adaiyur village with the support of Vivekananda Hospital. In these two camps we have screened 129 patients and 7 were selected for surgery and 17 were referred for spectacles.

In February, we have started the children home project with 7 kids and two staff members. Now this children home is serving these kids like a home. A proper medical checkups, good food, education and care is given to these kids in a home atmosphere.

Conclusion:

We are in the beginning of a long road and the journey started for a good cause. We are sure that during the journey, Regenboog will establish many strong landmarks and achievements for these good causes.
